

# Shipping Information

## Ryan Engineering Center

Value-Driven Engineering Solutions

## Shipping Instructions & Considerations

### ◆ SMALL-TO-MEDIUM-SIZED ITEMS

#### *Typical 2<sup>nd</sup> Day Delivery via National Carrier*

Adjuster will complete the Claim Information Form and the shipping label, package the item appropriately, enclose the completed Claim Information Form and affix the completed shipping label to the package and schedule the pickup of the package with the carrier.

### ◆ LARGE ITEMS

#### *Commercial Carrier 2-day or 3-day Freight*

Adjuster will complete the Claim Information Form and the shipping label, package the item appropriately, enclose the completed Claim Information Form, affix the completed shipping label to the package and schedule the pickup of the package with the carrier.

#### *Private Carrier: White Glove Treatment*

Adjuster will telephone Ryan Engineering and Ryan Engineering will make the necessary arrangements for the transportation and delivery of the item. The Adjuster will then complete the Claim Information Form and fax it to Ryan Engineering or attach it with the shipment. This choice offers the least potential for damage to the item and provides the most convenience for the member and adjuster.

Note: When shipping via FedEx, please include the member's name and number in the Internal Billing Reference area of the shipping label.

### ◆ INSURANCE

#### *Typical Insurance Coverage of Items during Shipment*

Items are insured by carriers up to \$100 or actual physical value of the item being shipped (unless more insurance is purchased for shipment). Items are not covered for consequential damage.

### ◆ OTHER IMPORTANT CONSIDERATIONS

#### *Additional helpful information*

- Completely fill out the Claim Information Form
- Provide additional details or resource information regarding the claim such as:
  - Pertinent pictures
  - Manuals
  - Copies of Repair Work Orders
  - Descriptions of Work Completed
  - Other reports

*Sample Shipping Rates on Back*
